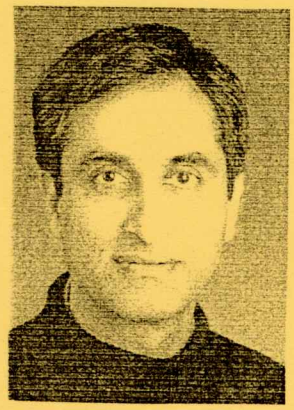
THE ROOTS OF INDIAN CIVILIZATION

Lecture by Dr. Subhash Kak

organized by
The Chair in Hindu Studies
Concordia University

Venue: Concordia University Hall Building (H 110)
1455 De Maisonneuve Blvd.
Date: Sunday October 10th
Time: 7:30 p.m.



Currently a professor at Louisiana State University, Baton Rouge, Dr. Subhash Kak is one of the world's leading historians of science. Among his many awards are the Science Academy Medal, Halliburton Award, UNDP Tokten Award and the Goyal Prize. Author of ten books and more than three hundred journal articles, Dr. Kak is equally at ease when dealing with science subjects and Vedic studies. He has researched ancient Indian astronomy, physics, mathematics and linguistics. He is best known for his discovery of an astronomical code in the design of the fire altars of ancient India. His scientific research includes quantum mechanics and neural networks. He has also explored the connections between Vedic science and modern theories of consciousness. This lecture will present completely new findings based on archaeology and analysis of forgotten texts and will look at the question of understanding Indian civilization in a new light.
